Software Design International

Bachelor of Science

TH Aschaffenburg
university of applied sciences

Are you ready to take the challenge?

You want to work with Software and create applications?

Then take the time to read the following because this might be the right choice for you! This degree programme offers a wide range of expertise from design to implementation of software products. You will also get the opportunity to gain practical experience in a company and apply everything that you have learned in a real-life setting. You will develop skills you need to problem-solve as a software engineer and develop that sense of professionalism to become a competent practitioner working both independently and as part of a team. You can choose to specialise in Data Science or Digital Transformation.

With us you will acquire technical expertise and industry readiness – and all this on a beautiful campus in a personal university atmosphere in exchange with enthusiastic lecturers, researchers and fellow students.

Do you have any questions?
We will be happy to advise you! You can find all further information about the degree programme and contact our student advisory service at:
